

Aditya Pahuja

Last updated May 20, 2026

Education

Stony Brook University, B.S. in Mathematics

August 2024 – May 2027

GPA: 3.96/4.00; Major GPA: 4.00/4.00

Relevant coursework:

- Undergraduate-level: multivariable calculus and linear algebra; real analysis; analysis in several variables; differential geometry of curves and surfaces; abstract algebra II
- Graduate-level: foundations of topology; algebra I; geometry/topology II; algebra II; complex analysis

Stuyvesant High School

September 2020 – June 2024

Research Experience

Directed Reading Program Participant

January 2026 – May 2026

- Read about differential topology independently and discussed it weekly with a graduate student mentor.
- Gave a short presentation at the end of the semester about vector fields on the sphere and wrote an expository paper on constructing characteristic classes via obstruction theory.

REU on machine learning in computational algebra

June 2025 – December 2025

- Used SageMath and PyTorch to generate data for and train neural networks to predict runtime for Gröbner basis computation of a given polynomial ideal and term ordering.

Work Experience

NYC Interscholastic Math League

Coordinator and Systems Administrator

June 2025 – present

- Supervised and guided the Soph-Frosh and Senior A contest writing teams during the fall and spring semesters to ensure quality and appropriate difficulty of three Soph-Frosh and five Senior A contests throughout the school year.
- Restructured the $\text{\LaTeX}$ files used to generate contests in order to organize them more modularly, making collaborative editing more convenient and reducing the chance of human error.

Senior A Problem Writer

June 2024 – May 2025

- Collaborated to write 10 high-quality math contests for high school seniors throughout NYC.

Teaching Assistant, MAT 125

August 2025 – December 2025

- Planned and taught a weekly 50-minute recitation section for 28 students in an introductory calculus course to supplement the lectures.
- Helped students from various math courses, including calculus, intro to proofs, and real analysis, in the Math Learning Center for three hours a week.

Volunteering

New York City Math Team

September 2024 – present

- Supervised Saturday math team practices during the spring and wrote a mock contest to provide the team with practice materials for the ARML math competition.
- Represented NYC as a coach at NYSML 2025 and 2026, where I respectively proctored a team and helped grade the power round.

Honors and Awards

Kuga-Sah Memorial Award

received May 2025, May 2026

- Award given to two students in each grade level at Stony Brook University for excellence in mathematics.

Honorable Mention, Putnam Mathematics Competition

received February 2025

- Scored 48/120 on the 2024 Putnam math contest, achieving rank 100 among 3988 participants.
